Arteriosclerosis
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Index to Volume 9
January–December 1989

Subject Index

A

Acetylated low density lipoproteins
Metabolism of Acetylated Low Density Lipoproteins by Monocyte-derived Macrophages from Patients with Werner's Syndrome, 644

Acute-phase reactants
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

Adaptive processes
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511

Adhesion
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824

Adolescence
Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment, I-111

Affinity chromatography
Age- and Sex-related Differences in Lipoproteins Containing Apoprotein A-I, 90

Ag(c/g)
Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied, 242

Alimentary lipemia
Alimentary Lipemia-induced Redistribution of Cholesteryl Ester between Lipoproteins. Studies in Normolipidemic, Combined Hyperlipidemic, and Hypercholesterolemic Men, 614

Allele-specific oligonucleotide probes
Apolipoprotein E2(Arg_{158}→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes, 50

Angina pectoris
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

Anthropometrics
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335

Antibodies
The Apoprotein and Antibody Standardization Program, 144

Antioxidants
Hormonal Contraceptive Increases Plasma Lipid Peroxides in Female Rats: Relationship to Platelet Aggregation and Lipid Biosynthesis, 84

Aorta
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159

Aortic lipoprotein uptake
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176

Apolipoproteins
Age- and Sex-related Differences in Lipoproteins Containing Apoprotein A-I, 90
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335
Distribution of Lipoproteins and Apolipoproteins in Young Adults. The CARDIA Study, 656
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785

Apolipoprotein A-I
Age- and Sex-related Differences in Lipoproteins Containing Apoprotein A-I, 90
Apolipoprotein A-I Metabolism in Cynomolgus Monkey. Identification and Characterization of β-migrating Pools, 470
Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys, 380
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Apolipoprotein A-II
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Apolipoprotein B
Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied, 242
Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency, 326
Detection and Quantification of Lipoprotein(a) in the Arterial Wall of 107 Coronary Bypass Patients, 579
Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons, 829
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538
Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment, I-111
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Apolipoprotein B metabolism
Dietary Fish Oil Increases Conversion of Very Low Density Lipoprotein Apoprotein B to Low Density Lipoprotein, 58

Apolipoprotein B mRNA
Effects of Eicosapentaenoic and Docosahexaenoic Acids on Apoprotein B mRNA and Secretion of Very Low Density Lipoprotein in HepG2 Cells, 836

Apolipoprotein E
Chylomicron Remnant Metabolism: Role of Hepatic Lipoprotein Receptors in Mediating Uptake, I-14

Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Apolipoprotein E2(Arg$_{158}$→Cys)
Apolipoprotein E2(Arg$_{158}$→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes, 50

Apolipoprotein E mutant detection
Apolipoprotein E2(Arg$_{158}$→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes, 50

Apolipoprotein E phenotype
Genotypic and Phenotypic Variation in Familial Hypercholesterolemia, I-75

Apolipoprotein E polymorphism
Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients, 237
Differential Distribution of Apolipoprotein E Isoforms in Human Plasma Lipoproteins, 405

Apolipoprotein E variants
Apolipoprotein E2(Arg$_{158}$→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes, 50

Apoprotein[a]
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Apoprotein B
Two Distinct Truncated Apolipoprotein B Species in a Kindred with Hypobetalipoproteinemia, 856

Apoproteins
The Apoprotein and Antibody Standardization Program, 144

Arterial smooth muscle
Effect of Normolipemic and Hyperlipemic Serum on Biosynthetic Response to Cyclic Stretching of Aortic Smooth Muscle Cells, 446

Arterial smooth muscle cells
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413

Arterial wall
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176
Detection and Quantification of Lipoprotein(a) in the Arterial Wall of 107 Coronary Bypass Patients, 579
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Arterial wall metabolism
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Arteriosclerosis
Detection and Quantification of Lipoprotein(a) in the Arterial Wall of 107 Coronary Bypass Patients, 579
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824
Relationship of Sulfated Glycosaminoglycans and Cholesterol Content in Normal and Arteriosclerotic Human Aorta, 154

Arteriovenous shunt
Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery, 812

Artery
Immune Mechanisms in Atherosclerosis, 567

α-Smooth muscle actin
Cytodifferentiation and Expression of α-Smooth Muscle Actin mRNA and Protein during Primary Culture of Aortic Smooth Muscle Cells. Correlation with Cell Density and Proliferative State, 633

Atherogenesis
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511
A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats, 224
Effect of Dietary Fat Saturation and Cholesterol on Low Density Lipoprotein Degradation by Mononuclear Cells of Cebus Monkeys, 919
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Atheroma
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Atheroma regression
Use of ^{3}H-Cholesteryl Linoleyl Ether as a Quantitative Marker for Loss of Cholesteryl Ester during Regression of Cholesterol-induced Aortic Atheromas in Rabbits, 247

Atherosclerosis
Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients, 237
Atherosclerosis in Rabbit Vein Grafts, 374
β-VLDL Metabolism by Pigeon Macrophages. Evidence for Two Binding Sites with Different Potentials for Promoting Cholesterol Accumulation, 673
Biological and Biochemical Properties of Fibroblast Growth Factors. Implications for the Pathogenesis of Atherosclerosis, 269
Cell Biology of Arterial Proteoglycans, 1
Cholesterol Revisited. Molecule, Medicine, and Media, 430
Clinical Features of Familial Hypercholesterolemia, I-66
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159
Development of Atherosclerosis in Genetically Hyperlipidemic Rabbits during Chronic Fish-oil Ingestion, 189
Effect of Dietary Omega-3 Fatty Acid on Serum Lipids, Platelet Function, and Atherosclerosis in Watanabe Heritable Hyperlipidemic Rabbits, 529
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Genetic Aspects of Familial Hypercholesterolemia and Its Diagnosis, I-3
Genotypic and Phenotypic Variation in Familial Hypercholesterolemia, I-75
Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies, 109
Immune Mechanisms in Atherosclerosis, 567
Intralipid Infusion Abolishes Ability of Human Serum to Cholesterol-load Cultured Macrophages, 67
Lipoprotein(a). Twenty-five Years of Progress, 565
Metabolism of Acetylated Low Density Lipoproteins by Monocyte-derived Macrophages from Patients with Werner's Syndrome, 644
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538

Molecular Basis of Familial Hypercholesterolemia, I-8
Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation, 398
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362
Plasmapheresis in Familial Hypercholesterolemia, I-152
Preservation and Structural Adaptation of Endothelium over Experimental Foam Cell Lesions: Quantitative Ultrastructural Study, 881
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593
Serum Lipids and Lipoproteins as Predictors of Atherosclerosis. An Autopsy Study, 560
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230
Use of ^{3}H-Cholesteryl Linoleyl Ether as a Quantitative Marker for Loss of Cholesteryl Ester during Regression of Cholesterol-induced Aortic Atheromas in Rabbits, 247

Atherosclerosis progression
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81

Autopsy studies
Serum Lipids and Lipoproteins as Predictors of Atherosclerosis. An Autopsy Study, 560

Autoradiography
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Axial dependence
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33

B

Baboon (*Papio* sp.)
Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons, 829

Balloon catheter
Balloon Catheter Injury to Rabbit Carotid Artery. I. Changes in Smooth Muscle Phenotype, 289
Balloon Catheter Injury to Rabbit Carotid Artery. II. Selective Increase in Reactivity to Some Vasoconstrictor Drugs, 299

β-migrating apolipoprotein A-I
Apolipoprotein A-I Metabolism in Cynomolgus Monkey. Identification and Characterization of β-migrating Pools, 470

β-very low density lipoprotein receptors
β-VLDL Metabolism by Pigeon Macrophages. Evidence for Two Binding Sites with Different Potentials for Promoting Cholesterol Accumulation, 673

β-very low density lipoproteins
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824
β-Very Low Density Lipoprotein Uptake in Cultured Fibroblasts and Smooth Muscle Cells from Watanabe Heritable Hyperlipidemic Rabbits, 501

Black children
Relation of Cholesterol to Apolipoprotein B in Low Density Lipoproteins of Children. The Bogalusa Heart Study, 493

Blood cholesterol
Optimal Nutritional Therapy in Treatment of Hyperlipoproteinemias, I-106

Blood coagulation
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Blood flow
In Vivo Modulation of Endothelial F-actin Microfilaments by Experimental Alterations in Shear Stress, 439
Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery, 812

Blood pressure
Insulin, Body Mass Index, and Cardiovascular Risk Factors in Premenopausal Women, 479

Body fat distribution
Adipose Tissue Distribution and Plasma Lipoprotein Levels in Obese Women. Importance of Intra-abdominal Fat, 203
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

Bsp 1286I
Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied, 242

Bypass vein graft
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

C

Calcium antagonist
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253

Candidate genes
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Canine carotid artery
Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery, 812

Cape Peninsula
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390

Cardiovascular disease
Cholesterol Revisited. Molecule, Medicine, and Media, 430
Effect of Alteration in Triglyceride Levels on Factor VII-Phospholipid Complexes in Plasma, 798
Insulin, Body Mass Index, and Cardiovascular Risk Factors in Premenopausal Women, 479

Cardiovascular risk
Test of Effect of Lipid Lowering by Diet on Cardiovascular Risk: The Minnesota Coronary Survey, 129

Catabolism of LDL
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

cDNA cloning
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Cell adhesion and migration
Cell Biology of Arterial Proteoglycans, 1

Cell biology
Cell Biology of Arterial Proteoglycans, 1

Cell cycle
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230

Cerebrotendinous xanthomatosis
Studies on Inborn Errors of Metabolism in Norway, I-164

Chemotaxis
Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation, 398

Children
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Cholesterol
Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit, 195
Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin, 355
Cholesterol Revisited. Molecule, Medicine, and Media, 430
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159
Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency, 326
Dietary Treatment of Familial Hypercholesterolemia, I-91
Effect of Dietary Fat Saturation and Cholesterol on Low Density Lipoprotein Degradation by Mononuclear Cells of Cebus Monkeys, 919
Genotypic and Phenotypic Variation in Familial Hypercholesterolemia, I-75
Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes, I-43
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593
Relationship of Sulfated Glycosaminoglycans and Cholesterol Content in Normal and Arteriosclerotic Human Aorta, 154
Serum Lipids and Lipoproteins as Predictors of Atherosclerosis. An Autopsy Study, 560

Cholesterol education program
Cholesterol Revisited. Molecule, Medicine, and Media, 430

Cholesterol-fed rabbit
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253
Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation, 398

Cholesterol feeding
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Cholesterol metabolism
Alimentary Lipemia-induced Redistribution of Cholesteryl Ester between Lipoproteins. Studies in Normolipidemic, Combined Hyperlipidemic, and Hypercholesterolemic Men, 614
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Molecular Basis of Familial Hypercholesterolemia, I-8

Cholesteryl ester
Alimentary Lipemia-induced Redistribution of Cholesteryl Ester between Lipoproteins. Studies in Normolipidemic, Combined Hyperlipidemic, and Hypercholesterolemic Men, 614
Use of ^{3}H-Cholesteryl Linoleyl Ether as a Quantitative Marker for Loss of Cholesteryl Ester during Regression of Cholesterol-induced Aortic Atheromas in Rabbits, 247

Cholesteryl ester transfer
Mechanisms of HDL Reduction after Probucol. Changes in HDL Subfractions and Increased Reverse Cholesteryl Ester Transfer, 462

Cholesteryl linoleyl ether
Use of ^{3}H-Cholesteryl Linoleyl Ether as a Quantitative Marker for Loss of Cholesteryl Ester during Regression of Cholesterol-induced Aortic Atheromas in Rabbits, 247

Cholestyramine
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

Chylomicron metabolism
A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats, 224

Colestipol
Effects of Combined Therapy with Lovastatin and Colestipol in Heterozygous Familial Hypercholesterolemia: Effects on Kinetics of Apolipoprotein B, I-135
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

Collagen
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33
Effect of Normolipemic and Hyperlipemic Serum on Biosynthetic Response to Cyclic Stretching of Aortic Smooth Muscle Cells, 446

Collapse
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Complement receptors
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802

Complement regulatory proteins
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802

Consensus sequences
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21

Contraceptive steroids
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261

Coronary arteriography
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81

Coronary artery
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19
Profiles of Velocity in Coronary Arteries of Dogs Indicate Lower Shear Rate along Inner Arterial Curvature, 167

Coronary artery disease
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335

Clinical Features of Familial Hypercholesterolemia, I-66
Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment, I-111

Coronary heart disease
Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients, 237
Cholesterol Revisited. Molecule, Medicine, and Media, 430
Detection and Quantification of Lipoprotein(a) in the Arterial Wall of 107 Coronary Bypass Patients, 579
Differential Distribution of Apolipoprotein E Isoforms in Human Plasma Lipoproteins, 405
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390
Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province, 211
Parental History of Diabetes Is Associated with Increased Cardiovascualr Risk Factors, 928
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785
Predictive Genetic Testing to Control Coronary Heart Disease and [illegible]lemia, I-50
[illegible]ation between Clinically Apparent Herpesvirus [illegible]nd Coronary Incidence at Older Ages: The [illegible]amingham Heart Study, 877

Corticosteroids
Prednisone Increases Low Density Lipoprotein in Cynomolgus Monkeys Fed Saturated Fat and Cholesterol, 848

Cynomolgus monkeys
Apolipoprotein A-I Metabolism in Cynomolgus Monkey. Identification and Characterization of β-migrating Pools, 470

Cytodifferentiation
Cytodifferentiation and Expression of α-Smooth Muscle Actin mRNA and Protein during Primary Culture of Aortic Smooth Muscle Cells. Correlation with Cell Density and Proliferative State, 633

D

Dehydroepiandrosterone
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159

Demulen
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261

Density gradient ultracentrifugation
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604

Diabetes
Asymptomatic Hyperglycemia Is Associated with Lipid and Lipoprotein Changes Favoring Atherosclerosis, 665
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176
Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors, 928

Diagnosis
Gene Probes in Diagnosis of Familial Hypercholesterolemia, I-59

Diet
Dietary Treatment of Familial Hypercholesterolemia, I-91
Effect of Dietary Fat Saturation and Cholesterol on Low Density Lipoprotein Degradation by Mononuclear Cells of Cebus Monkeys, 919

Diet compliance
Optimal Nutritional Therapy in Treatment of Hyperlipoproteinemias, I-106

Dietary cholesterol
Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys, 380

DNA
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Dogs
Profiles of Velocity in Coronary Arteries of Dogs Indicate Lower Shear Rate along Inner Arterial Curvature, 167

E

Eccentric intimal thickening
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Eicosanoids
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413

Embolism
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Endothelial cell
Cell Biology of Arterial Proteoglycans, 1

Endothelial cells
Effect of Fibrin on Endothelial Cell Production of Prostacyclin and Tissue Plasminogen Activator, 43
Effects of Porcine Aortic Smooth Muscle Cell Conditioned Medium on Endothelial Cell Replication, 76
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery, 812
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

Endothelial junction
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230

Endothelial monolayers
Passage of Low Density Lipoproteins through Monolayers of Human Arterial Endothelial Cells. Effects of Vasoactive Substances in an In Vitro Model, 550

Endothelium
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824
Immune Mechanisms in Atherosclerosis, 567
Preservation and Structural Adaptation of Endothelium over Experimental Foam Cell Lesions: Quantitative Ultrastructural Study, 881
Regional Variability of Prostacyclin Biosynthesis, 368
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147
In Vivo Modulation of Endothelial F-actin Microfilaments by Experimental Alterations in Shear Stress, 439
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230

Estradiol
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136

Estrogen
Hormonal Contraceptive Increases Plasma Lipid Peroxides in Female Rats: Relationship to Platelet Aggregation and Lipid Biosynthesis, 84

Ethanol
Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat, 122

Exercise
Effects of Exercise-induced Weight Loss on Low Density Lipoprotein Subfractions in Healthy Men, 623
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

F

F-actin microfilaments
In Vivo Modulation of Endothelial F-actin Microfilaments by Experimental Alterations in Shear Stress, 439

Factor VII
Effect of Alteration in Triglyceride Levels on Factor VII-Phospholipid Complexes in Plasma, 798

Familial combined hyperlipidemia
Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency, 326

Familial hypercholesterolemia
Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin, 355
Clinical Features of Familial Hypercholesterolemia, I-66
Dietary Treatment of Familial Hypercholesterolemia, I-91
Gene Probes in Diagnosis of Familial Hypercholesterolemia, I-59
Genetic Aspects of Familial Hypercholesterolemia and Its Diagnosis, I-3
Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province, 211
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81
Studies on Inborn Errors of Metabolism in Norway, I-164
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121
Watanabe Heritable Hyperlipidemic Rabbit: Animal Model for Familial Hypercholesterolemia, I-33

Familial LCAT deficiency
Studies on Inborn Errors of Metabolism in Norway, I-164

Fat
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

Fat tolerance test
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

Fatty streak
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Female rats
A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats, 224

Fibrin
Effect of Fibrin on Endothelial Cell Production of Prostacyclin and Tissue Plasminogen Activator, 43

Fibrin and atherosclerosis
Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies, 109

Fibrinolysis
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Fibroblast growth factor
Biological and Biochemical Properties of Fibroblast Growth Factors. Implications for the Pathogenesis of Atherosclerosis, 269
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Fibroblasts
β-Very Low Density Lipoprotein Uptake in Cultured Fibroblasts and Smooth Muscle Cells from Watanabe Heritable Hyperlipidemic Rabbits, 501

Fish oils
Development of Atherosclerosis in Genetically Hyperlipidemic Rabbits during Chronic Fish-oil Ingestion, 189
Dietary Fish Oil Increases Conversion of Very Low Density Lipoprotein Apoprotein B to Low Density Lipoprotein, 58
Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects, 345

Foam cell transformation
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453

Foam cells
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538
Preservation and Structural Adaptation of Endothelium over Experimental Foam Cell Lesions: Quantitative Ultrastructural Study, 881

Forskolin
Passage of Low Density Lipoproteins through Monolayers of Human Arterial Endothelial Cells. Effects of Vasoactive Substances in an In Vitro Model, 550

Framingham Heart Study
Unlikely Association between Clinically Apparent Herpesvirus Infection and Coronary Incidence at Older Ages: The Framingham Heart Study, 877

French Canadians
Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province, 211

G

Gene–environment interaction
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Gene structure
Genetic Aspects of Familial Hypercholesterolemia and Its Diagnosis, I-3

Genetics
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335
Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients, 237
Genetic and Environmental Determinants of Serum Lipids and Lipoproteins in French Canadian Families, 308
Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors, 928

Glycosaminoglycans
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21

Glycosylation
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176

Granule fusion
A Role for Intracellular Histamine in Ultrastructural Changes Induced in Platelets by Phorbol Esters, 684

Growth factors
Biological and Biochemical Properties of Fibroblast Growth Factors. Implications for the Pathogenesis of Atherosclerosis, 269
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413

Growth inhibitor
Effects of Porcine Aortic Smooth Muscle Cell Conditioned Medium on Endothelial Cell Replication, 76

Growth stimulator
Effects of Porcine Aortic Smooth Muscle Cell Conditioned Medium on Endothelial Cell Replication, 76

H

Hemodynamics
In Vivo Modulation of Endothelial F-actin Microfilaments by Experimental Alterations in Shear Stress, 439

Hemostasis
Cell Biology of Arterial Proteoglycans, 1

Heparan sulfate
Relationship of Sulfated Glycosaminoglycans and Cholesterol Content in Normal and Arteriosclerotic Human Aorta, 154

Heparin
Effect of Heparin on Adaptation of Vein Grafts to Arterial Circulation, 523
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Hepatic lipase
Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys, 380
Large Buoyant LDL-like Particles in Hepatic Lipase Deficiency, 319
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

Hepatocytes
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

HepG2
Effects of Eicosapentaenoic and Docosahexaenoic Acids on Apoprotein B mRNA and Secretion of Very Low Density Lipoprotein in HepG2 Cells, 836

Herpesviruses
Unlikely Association between Clinically Apparent Herpesvirus Infection and Coronary Incidence at Older Ages: The Framingham Heart Study, 877

Heterozygous familial hypercholesterolemia
Effects of Combined Therapy with Lovastatin and Colestipol in Heterozygous Familial Hypercholesterolemia: Effects on Kinetics of Apolipoprotein B, I-135

High density lipoprotein cholesterol
Adipose Tissue Distribution and Plasma Lipoprotein Levels in Obese Women. Importance of Intra-abdominal Fat, 203
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390

High density lipoprotein metabolism
Alimentary Lipemia-induced Redistribution of Cholesteryl Ester between Lipoproteins. Studies in Normolipidemic, Combined Hyperlipidemic, and Hypercholesterolemic Men, 614

High density lipoprotein subfractions
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261
Mechanisms of HDL Reduction after Probucol. Changes in HDL Subfractions and Increased Reverse Cholesteryl Ester Transfer, 462

High density lipoproteins
Apolipoprotein A-I Metabolism in Cynomolgus Monkey. Identification and Characterization of β-migrating Pools, 470
Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys, 380
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785
Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment, I-111
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

High-risk strategy
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Histamine
A Role for Intracellular Histamine in Ultrastructural Changes Induced in Platelets by Phorbol Esters, 684
Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit, 195

Histocompatibility
Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells, 279

HLA
Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells, 279

Homozygous familial hypercholesterolemia
Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia, I-158

Hormone
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159

HSV-1
Unlikely Association between Clinically Apparent Herpesvirus Infection and Coronary Incidence at Older Ages: The Framingham Heart Study, 877

Human aorta
Relationship of Sulfated Glycosaminoglycans and Cholesterol Content in Normal and Arteriosclerotic Human Aorta, 154

Human genetic disease
Molecular Basis of Familial Hypercholesterolemia, I-8

4-Hydroxynonenal
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538

Hypercholesterolemia
Atherosclerosis in Rabbit Vein Grafts, 374
Mechanisms of HDL Reduction after Probucol. Changes in HDL Subfractions and Increased Reverse Cholesteryl Ester Transfer, 462

Hyperglycemia
Asymptomatic Hyperglycemia Is Associated with Lipid and Lipoprotein Changes Favoring Atherosclerosis, 665

Hyperlipemia
Effect of Normolipemic and Hyperlipemic Serum on Biosynthetic Response to Cyclic Stretching of Aortic Smooth Muscle Cells, 446
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

Hyperlipidemia
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia.

Study of Utah Patients with Familial Dyslipidemic Hypertension, 335
Effect of Dietary Omega-3 Fatty Acid on Serum Lipids, Platelet Function, and Atherosclerosis in Watanabe Heritable Hyperlipidemic Rabbits, 529
Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat, 122
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934
Plasma Lipid Secretion and Clearance in Hyperlipidemic JCR:LA-Corpulent Rats, 869
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Hyperlipoproteinemia
Clinical Features of Familial Hypercholesterolemia, I-66
Lipoprotein Metabolism in Familial Hypercholesterolemia, I-39
Optimal Nutritional Therapy in Treatment of Hyperlipoproteinemias, I-106

Hypertension
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335

Hypertriglyceridemia
Enhanced Lipoprotein Lipase Secretion from Human Monocyte-derived Macrophages Caused by Hypertriglyceridemic Very Low Density Lipoproteins, 650
Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects, 345

Hypobetalipoproteinemia pedigree
Two Distinct Truncated Apolipoprotein B Species in a Kindred with Hypobetalipoproteinemia, 856

Hypolipidemic drugs
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

I

Image analysis
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Immunoblotting
Differential Distribution of Apolipoprotein E Isoforms in Human Plasma Lipoproteins, 405

Immunohistochemistry of atherosclerosis
Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies, 109

Immunohistochemistry of fibrin
Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies, 109

Immunology
Immune Mechanisms in Atherosclerosis, 567

Inflammation
Immune Mechanisms in Atherosclerosis, 567

Inheritance
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Injury
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Insulin
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136
Insulin, Body Mass Index, and Cardiovascular Risk Factors in Premenopausal Women, 479
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

Insulin resistance
Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat, 122
Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors, 928

Interferons
Immune Mechanisms in Atherosclerosis, 567
Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells, 279

Interleukins
Immune Mechanisms in Atherosclerosis, 567

Intermediate density lipoproteins
Effects of Exercise-induced Weight Loss on Low Density Lipoprotein Subfractions in Healthy Men, 623

Internal repeats
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Intimal thickening
Balloon Catheter Injury to Rabbit Carotid Artery. I. Changes in Smooth Muscle Phenotype, 289
Balloon Catheter Injury to Rabbit Carotid Artery. II. Selective Increase in Reactivity to Some Vasoconstrictor Drugs, 299

Intra-abdominal fat
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

Intralipid
Intralipid Infusion Abolishes Ability of Human Serum to Cholesterol-load Cultured Macrophages, 67

Intravenous lipid emulsions
Intralipid Infusion Abolishes Ability of Human Serum to Cholesterol-load Cultured Macrophages, 67

Ischemic heart disease
Clinical Features of Familial Hypercholesterolemia, I-66

J

JCR:LA-cp rat
Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat, 122
Plasma Lipid Secretion and Clearance in Hyperlipidemic JCR:LA-Corpulent Rats, 869

K

6-Keto-PGF$_{1\alpha}$
Regional Variability of Prostacyclin Biosynthesis, 368

Kinetic modeling
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Kinetics
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895

L

Lanthanum chloride
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253

Lesions
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

"Level genes"
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Lipid clearance
Plasma Lipid Secretion and Clearance in Hyperlipidemic JCR:LA-Corpulent Rats, 869

Lipid hydroperoxides
Development of Atherosclerosis in Genetically Hyperlipidemic Rabbits during Chronic Fish-oil Ingestion, 189

Lipid lowering by diet
Test of Effect of Lipid Lowering by Diet on Cardiovascular Risk: The Minnesota Coronary Survey, 129

Lipid peroxides
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453

Lipid-proteoglycan interactions
Cell Biology of Arterial Proteoglycans, 1

Lipid secretion rate
Plasma Lipid Secretion and Clearance in Hyperlipidemic JCR:LA-Corpulent Rats, 869

Lipids
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136
Asymptomatic Hyperglycemia Is Associated with Lipid and Lipoprotein Changes Favoring Atherosclerosis, 665
Genetic and Environmental Determinants of Serum Lipids and Lipoproteins in French Canadian Families, 308
Insulin, Body Mass Index, and Cardiovascular Risk Factors in Premenopausal Women, 479
Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors, 928

Lipoprotein(a)
Detection and Quantification of Lipoprotein(a) in the Arterial Wall of 107 Coronary Bypass Patients, 579
Lipoprotein(a). Twenty-five Years of Progress, 565
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Lipoproteins
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511
Age- and Sex-related Differences in Lipoproteins Containing Apoprotein A-I, 90
Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients, 237
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136
Asymptomatic Hyperglycemia Is Associated with Lipid and Lipoprotein Changes Favoring Atherosclerosis, 665
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824
β-VLDL Metabolism by Pigeon Macrophages. Evidence for Two Binding Sites with Different Potentials for Promoting Cholesterol Accumulation, 673
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159
Distribution of Lipoproteins and Apolipoproteins in Young Adults. The CARDIA Study, 656
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390
Genetic and Environmental Determinants of Serum Lipids and Lipoproteins in French Canadian Families, 308
Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province, 211
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21
Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors, 928
Prednisone Increases Low Density Lipoprotein in Cynomolgus Monkeys Fed Saturated Fat and Cholesterol, 848
Serum Lipids and Lipoproteins as Predictors of Atherosclerosis. An Autopsy Study, 560

Lipoprotein lipase
A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats, 224
Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency, 326
Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys, 380
Enhanced Lipoprotein Lipase Secretion from Human Monocyte-derived Macrophages Caused by Hypertriglyceridemic Very Low Density Lipoproteins, 650
Large Buoyant LDL-like Particles in Hepatic Lipase Deficiency, 319
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

Lipoprotein receptors
β-Very Low Density Lipoprotein Uptake in Cultured Fibroblasts and Smooth Muscle Cells from Watanabe Heritable Hyperlipidemic Rabbits, 501

Lipoprotein size
Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences, 176

Liver transplantation
Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia, I-158

Lovastatin
Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin, 355
Effects of Combined Therapy with Lovastatin and Colestipol in Heterozygous Familial Hypercholesterolemia: Effects on Kinetics of Apolipoprotein B, I-135
Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia, I-158
Treatment of Familial Hypercholesterolemia with Drugs in Children, I-145
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

Low density lipoprotein apheresis
Plasmapheresis in Familial Hypercholesterolemia, I-152

Low density lipoprotein apolipoprotein B
Relation of Cholesterol to Apolipoprotein B in Low Density Lipoproteins of Children. The Bogalusa Heart Study, 493

Low density lipoprotein cholesterol
Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons, 829
Relation of Cholesterol to Apolipoprotein B in Low Density Lipoproteins of Children. The Bogalusa Heart Study, 493

Low density lipoprotein composition
Relation of Cholesterol to Apolipoprotein B in Low Density Lipoproteins of Children. The Bogalusa Heart Study, 493

Low density lipoprotein receptor gene
Genotypic and Phenotypic Variation in Familial Hypercholesterolemia, I-75
Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons, 829

Low density lipoprotein receptors
β-Very Low Density Lipoprotein Uptake in Cultured Fibroblasts and Smooth Muscle Cells from Watanabe Heritable Hyperlipidemic Rabbits, 501
Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin, 355
Chylomicron Remnant Metabolism: Role of Hepatic Lipoprotein Receptors in Mediating Uptake, I-14
Clinical Features of Familial Hypercholesterolemia, I-66
Gene Probes in Diagnosis of Familial Hypercholesterolemia, I-59
Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes, I-43
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908
Molecular Basis of Familial Hypercholesterolemia, I-8

Low density lipoprotein subfractions
Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension, 335

Low density lipoproteins
Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied, 242
Clinical Features of Familial Hypercholesterolemia, I-66
Dietary Fish Oil Increases Conversion of Very Low Density Lipoprotein Apoprotein B to Low Density Lipoprotein, 58
Dietary Treatment of Familial Hypercholesterolemia, I-91
Effect of Dietary Fat Saturation and Cholesterol on Low Density Lipoprotein Degradation by Mononuclear Cells of Cebus Monkeys, 919
Effects of Exercise-induced Weight Loss on Low Density Lipoprotein Subfractions in Healthy Men, 623
Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects, 345
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908
Large Buoyant LDL-like Particles in Hepatic Lipase Deficiency, 319
Lipoprotein Metabolism in Familial Hypercholesterolemia, I-39
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538
Passage of Low Density Lipoproteins through Monolayers of Human Arterial Endothelial Cells. Effects of Vasoactive Substances in an In Vitro Model, 550
Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment, I-111
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230
Watanabe Heritable Hyperlipidemic Rabbit: Animal Model for Familial Hypercholesterolemia, I-33

Lymphocytes
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802
Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes, I-43

Lymphokines
Immune Mechanisms in Atherosclerosis, 567
Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells, 279

Lyso PtdCho
Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation, 398

M

Macrophage cholesterol
Intralipid Infusion Abolishes Ability of Human Serum to Cholesterol-load Cultured Macrophages, 67

Macrophage foam cells
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Macrophages
Atherosclerosis in Rabbit Vein Grafts, 374
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802
Enhanced Lipoprotein Lipase Secretion from Human Monocyte-derived Macrophages Caused by Hypertriglyceridemic Very Low Density Lipoproteins, 650
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453

Male rats
A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats, 224

Maxepa
Dietary Fish Oil Increases Conversion of Very Low Density Lipoprotein Apoprotein B to Low Density Lipoprotein, 58

Mechanisms of atherogenesis
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Meeting summary
Lipoprotein(a). Twenty-five Years of Progress, 565

Membrane synthesis
Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes, I-43

Methacholine
Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit, 195

Methylmalonic acidemia
Studies on Inborn Errors of Metabolism in Norway, I-164

Mitochondrial ATPase
Chylomicron Remnant Metabolism: Role of Hepatic Lipoprotein Receptors in Mediating Uptake, I-14

Mitosis
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230

Mitral valve
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253

Molecular dynamics
Molecular Modeling of Protein-Glycosaminoglycan Interactions, 21

Monkeys
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261

Monocyte-derived macrophages
Metabolism of Acetylated Low Density Lipoproteins by Monocyte-derived Macrophages from Patients with Werner's Syndrome, 644

Monocyte/macrophage
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511

Monocytes
β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion, 824
Immune Mechanisms in Atherosclerosis, 567
Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation, 398

Monocyte procoagulant activity
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Monokines
Immune Mechanisms in Atherosclerosis, 567

Mononuclear leukocytes
Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin, 355

Morphology
A Role for Intracellular Histamine in Ultrastructural Changes Induced in Platelets by Phorbol Esters, 684

Morphometry
Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery, 812

mRNA
Cytodifferentiation and Expression of α-Smooth Muscle Actin mRNA and Protein during Primary Culture of Aortic Smooth Muscle Cells. Correlation with Cell Density and Proliferative State, 633

mRNA sequencing
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Mutations
Genetic Aspects of Familial Hypercholesterolemia and Its Diagnosis, I-3
Molecular Basis of Familial Hypercholesterolemia, I-8

Myocardial lesions
Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat, 122

N

N-3 fatty acids
Effects of Eicosapentaenoic and Docosahexaenoic Acids on Apoprotein B mRNA and Secretion of Very Low Density Lipoprotein in HepG2 Cells, 836

***N*-glycosylation**
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Niacin
Treatment of Familial Hypercholesterolemia with Drugs in Children, I-145

Nicotinic acid
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

Nonhuman primate
Prednisone Increases Low Density Lipoprotein in Cynomolgus Monkeys Fed Saturated Fat and Cholesterol, 848

Norepinephrine
Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit, 195

Nutrition
Cholesterol Revisited. Molecule, Medicine, and Media, 430
Optimal Nutritional Therapy in Treatment of Hyperlipoproteinemias, I-106

Nutritional therapy
Cholesterol Revisited. Molecule, Medicine, and Media, 430

O

Obesity
Adipose Tissue Distribution and Plasma Lipoprotein Levels in Obese Women. Importance of Intra-abdominal Fat, 203
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136
Role of Hepatic-Triglyceride Lipase Activity in the Association between Intra-abdominal Fat and Plasma HDL Cholesterol in Obese Women, 485

ω-3 fatty acids
Development of Atherosclerosis in Genetically Hyperlipidemic Rabbits during Chronic Fish-oil Ingestion, 189
Effect of Dietary Omega-3 Fatty Acid on Serum Lipids, Platelet Function, and Atherosclerosis in Watanabe Heritable Hyperlipidemic Rabbits, 529
Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects, 345

Omental fat
Adipose Tissue Distribution and Plasma Lipoprotein Levels in Obese Women. Importance of Intra-abdominal Fat, 203

Ovral
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261

Oxidation
Modification of Low Density Lipoprotein with 4-Hydroxynonenal Induces Uptake by Macrophages, 538

Oxidized low density lipoproteins
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453

P

Path analysis
Genetic and Environmental Determinants of Serum Lipids and Lipoproteins in French Canadian Families, 308

Pentosan polysulfate
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Peptide sequencing
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Perfusion chamber
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33

Permeability
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908
Passage of Low Density Lipoproteins through Monolayers of Human Arterial Endothelial Cells. Effects of Vasoactive Substances in an In Vitro Model, 550

Peroxisomal disorders
Studies on Inborn Errors of Metabolism in Norway, I-164

Phenotype
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413

Phenylketonuria
Studies on Inborn Errors of Metabolism in Norway, I-164

Phytanic acid storage disease
Studies on Inborn Errors of Metabolism in Norway, I-164

Planimetry
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159

Plaque
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Plasmapheresis
Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia, I-158

Plasma cholesterol
Test of Effect of Lipid Lowering by Diet on Cardiovascular Risk: The Minnesota Coronary Survey, 129

Plasma exchange
Plasmapheresis in Familial Hypercholesterolemia, I-152

Plasma lipids
Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys, 261

Plasma lipoproteins
Clinical Features of Familial Hypercholesterolemia, I-66

Plasminogen
Lipoprotein(a). Twenty-five Years of Progress, 565

Plasminogen activator inhibitor
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Plasminogen activator inhibitor-1
Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response, 362

Platelet adhesion
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33

Platelet aggregation
Hormonal Contraceptive Increases Plasma Lipid Peroxides in Female Rats: Relationship to Platelet Aggregation and Lipid Biosynthesis, 84

Platelet-derived growth factor
Biological and Biochemical Properties of Fibroblast Growth Factors. Implications for the Pathogenesis of Atherosclerosis, 269

Platelet function
Effect of Dietary Omega-3 Fatty Acid on Serum Lipids, Platelet Function, and Atherosclerosis in Watanabe Heritable Hyperlipidemic Rabbits, 529

Platelet-vessel wall interactions
Functional Behavior of Vessels from Pigs with von Willebrand Disease. Values of Platelet Deposition Are Identical to Those Obtained on Normal Vessels, 184

Platelets
A Role for Intracellular Histamine in Ultrastructural Changes Induced in Platelets by Phorbol Esters, 684

Polymorphism
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Polyunsaturated fat
Dietary Treatment of Familial Hypercholesterolemia, I-91

Population frequency
Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province, 211

Portacaval shunt surgery
Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia, I-158

Postprandial lipemia
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

Pre-β–migrating HDL
Apolipoprotein A-I Metabolism in Cynomolgus Monkey. Identification and Characterization of β-migrating Pools, 470

Premenopausal women
Insulin, Body Mass Index, and Cardiovascular Risk Factors in Premenopausal Women, 479

Prevention
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Probucol
Mechanisms of HDL Reduction after Probucol. Changes in HDL Subfractions and Increased Reverse Cholesteryl Ester Transfer, 462
Probucol Does Not Affect Lipoprotein Metabolism in Macrophages of Watanabe Heritable Hyperlipidemic Rabbits, 453

Proliferation
Cell Biology of Arterial Proteoglycans, 1
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes, I-43

Prostacyclin
Effect of Fibrin on Endothelial Cell Production of Prostacyclin and Tissue Plasminogen Activator, 43
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Regional Variability of Prostacyclin Biosynthesis, 368

Prostaglandin X
Regional Variability of Prostacyclin Biosynthesis, 368

Prostaglandins
Eicosanoids in Regulation of Arterial Smooth Muscle Cell Phenotype, Proliferative Capacity, and Cholesterol Metabolism, 413
Regional Variability of Prostacyclin Biosynthesis, 368

Protein conformation
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Protein kinase C
A Role for Intracellular Histamine in Ultrastructural Changes Induced in Platelets by Phorbol Esters, 684

Proteoglycans
Cell Biology of Arterial Proteoglycans, 1

Q

Quantitative arteriography
Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study, I-81

R

Rabbit β-VLDL
β-VLDL Metabolism by Pigeon Macrophages. Evidence for Two Binding Sites with Different Potentials for Promoting Cholesterol Accumulation, 673

Rabbits
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159
Effect of Dietary Omega-3 Fatty Acid on Serum Lipids, Platelet Function, and Atherosclerosis in Watanabe Heritable Hyperlipidemic Rabbits, 529
Effect of Heparin on Adaptation of Vein Grafts to Arterial Circulation, 523
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Radiolabel
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Reactivity
Balloon Catheter Injury to Rabbit Carotid Artery. II. Selective Increase in Reactivity to Some Vasoconstrictor Drugs, 299

Receptors
Lipoprotein Metabolism in Familial Hypercholesterolemia, I-39

Regression
Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects, 253

Repair process
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

Resins
Treatment of Familial Hypercholesterolemia with Drugs in Children, I-145

Restriction fragment length polymorphisms
Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied, 242
Gene Probes in Diagnosis of Familial Hypercholesterolemia, I-59
Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons, 829
Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia, I-50

Risk
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390

S

Saturated fat
Dietary Treatment of Familial Hypercholesterolemia, I-91

Serotonin
Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit, 195

Serum cholesterol
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604

Serum lipoproteins
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604

Serum triglycerides
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604

Sex hormone binding globulin
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136

Shear dependence
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511

Shear rate
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33
Profiles of Velocity in Coronary Arteries of Dogs Indicate Lower Shear Rate along Inner Arterial Curvature, 167

Shear stress
In Vivo Modulation of Endothelial F-actin Microfilaments by Experimental Alterations in Shear Stress, 439

Show Racer pigeon
β-VLDL Metabolism by Pigeon Macrophages. Evidence for Two Binding Sites with Different Potentials for Promoting Cholesterol Accumulation, 673

Simvastatin
Treatment of Familial Hypercholesterolemia with Drugs in Children, I-145
Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs, I-121

Smooth muscle
Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells, 279

Smooth muscle cells
A Biologically Plausible Model of Thickening of Arterial Intima under Shear, 511
Atherosclerosis in Rabbit Vein Grafts, 374
β-Very Low Density Lipoprotein Uptake in Cultured Fibroblasts and Smooth Muscle Cells from Watanabe Heritable Hyperlipidemic Rabbits, 501
Cell Biology of Arterial Proteoglycans, 1
Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions, 802
Effect of Heparin on Adaptation of Vein Grafts to Arterial Circulation, 523
Effects of Porcine Aortic Smooth Muscle Cell Conditioned Medium on Endothelial Cell Replication, 76
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Smooth muscle culture
Cytodifferentiation and Expression of α-Smooth Muscle Actin mRNA and Protein during Primary Culture of Aortic Smooth Muscle Cells. Correlation with Cell Density and Proliferative State, 633

Smooth muscle phenotype
Balloon Catheter Injury to Rabbit Carotid Artery. I. Changes in Smooth Muscle Phenotype, 289

Smooth muscle, vascular
Immune Mechanisms in Atherosclerosis, 567

South Africa
Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels, 390

Standardization
The Apoprotein and Antibody Standardization Program, 144

Stenosis
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Stroke
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842

Subfractions
Low Density Lipoprotein Subfractions and Relationship to Other Risk Factors for Coronary Artery Disease in Healthy Individuals, 604

Sulfated polysaccharide
Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium, 147

T

Tendon xanthomas
Clinical Features of Familial Hypercholesterolemia, I-66

Tensile stress
Effect of Normolipemic and Hyperlipemic Serum on Biosynthetic Response to Cyclic Stretching of Aortic Smooth Muscle Cells, 446

Testosterone
Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors, 136

Thrombosis
Effect of Stenosis on Wall Motion: A Possible Mechanism of Stroke and Transient Ischemic Attack, 842
Hormonal Contraceptive Increases Plasma Lipid Peroxides in Female Rats: Relationship to Platelet Aggregation and Lipid Biosynthesis, 84
Lipoprotein(a). Twenty-five Years of Progress, 565

Thrombosis and atherosclerosis
Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies, 109

Thrombus growth
Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion, 33

Tissue factor
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Tissue plasminogen activator
Effect of Fibrin on Endothelial Cell Production of Prostacyclin and Tissue Plasminogen Activator, 43
Levels of Three Hemostatic Factors in Relation to Serum Lipids: Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor, 934

Training
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217

Transfer activity
Alimentary Lipemia-induced Redistribution of Cholesteryl Ester between Lipoproteins. Studies in Normolipidemic, Combined Hyperlipidemic, and Hypercholesterolemic Men, 614

Transitional lesion
Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults, I-19

Transport
Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta, 230

Transport into arterial wall
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions, 895
Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits: II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries, 908

Triglyceridemia
Effect of Alteration in Triglyceride Levels on Factor VII-Phospholipid Complexes in Plasma, 798

Triglycerides
Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit, 159
Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency, 326
Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal, 217
Pathophysiology of Reverse Cholesterol Transport: Insights from Inherited Disorders of Lipoprotein Metabolism, 785
Quantitation and Localization of Apolipoproteins[a] and B in Coronary Artery Bypass Vein Grafts Resected at Reoperation, 593

Tritiated thymidine
Effect of Heparin on Adaptation of Vein Grafts to Arterial Circulation, 523

Trypsin releasability
Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins, 96

Type III hyperlipoproteinemia
Apolipoprotein E2(Arg_{158}→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes, 50
Chylomicron Remnant Metabolism: Role of Hepatic Lipoprotein Receptors in Mediating Uptake, I-14

Type IV hyperlipidemia
Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects, 345

U

Ultrastructure

Volume 9, Number 1 January/February 1989

INTRODUCTION

I-1 Familial Hypercholesterolemia. 50 Years of Research
Leiv Ose and Helge Tolleshaug

GENETIC AND BIOCHEMICAL BASIS OF FAMILIAL HYPERCHOLESTEROLEMIA

I-3 Genetic Aspects of Familial Hypercholesterolemia and Its Diagnosis
Arno G. Motulsky

I-8 Molecular Basis of Familial Hypercholesterolemia
David W. Russell, Victoria Esser, and Helen H. Hobbs

I-14 Chylomicron Remnant Metabolism: Role of Hepatic Lipoprotein Receptors in Mediating Uptake
Robert W. Mahley, David Y. Hui, Thomas L. Innerarity, and Ulrike Beisiegel

PATHOGENESIS OF FAMILIAL HYPERCHOLESTEROLEMIA

I-19 Evolution and Progression of Atherosclerotic Lesions in Coronary Arteries of Children and Young Adults
Herbert C. Stary

I-33 Watanabe Heritable Hyperlipidemic Rabbit: Animal Model for Familial Hypercholesterolemia
Richard J. Havel, Nobuhiro Yamada, and David M. Shames

I-39 Lipoprotein Metabolism in Familial Hypercholesterolemia
James Shepherd and Christopher J. Packard

DIAGNOSIS OF FAMILIAL HYPERCHOLESTEROLEMIA

I-43 Identification of Low Density Lipoprotein Receptor Abnormalities by Assaying Functional Receptors on Proliferating Lymphocytes
Jennifer A. Cuthbert and Peter E. Lipsky

I-50 Predictive Genetic Testing to Control Coronary Heart Disease and Hyperlipidemia
Kåre Berg

I-59 Gene Probes in Diagnosis of Familial Hypercholesterolemia
Steve Humphries, Rohan Taylor, Mohamed Jeenah, Anson Dunning, Bernhard Horsthemke, Mary Seed, Herbert Schuster, and Gunter Wolfram

CLINICAL FEATURES OF FAMILIAL HYPERCHOLESTEROLEMIA

I-66 Clinical Features of Familial Hypercholesterolemia
Akira Yamamoto, Tetsuro Kamiya, Taku Yamamura, Shinji Yokoyama, Yasunori Horiguchi, Tohru Funahashi, Akito Kawaguchi, Yasuko Miyake, Shintaro Beppu, Katsunori Ishikawa, Yuji Matsuzawa, and Shigeko Takaichi

I-75 Genotypic and Phenotypic Variation in Familial Hypercholesterolemia
Gilbert R. Thompson, Mary Seed, Saro Niththyananthan, Susan McCarthy, and Margaret Thorogood

I-81 Progression of Coronary Atherosclerosis in Patients with Probable Familial Hypercholesterolemia: Quantitative Arteriographic Assessment of Patients in NHLBI Type II Study
B. Greg Brown, Jiin T. Lin, Sheryl Kelsey, Eugene R. Passamani, Robert I. Levy, Harold T. Dodge, and Katherine M. Detre

DIETARY TREATMENT OF FAMILIAL HYPERCHOLESTEROLEMIA

I-91 Dietary Treatment of Familial Hypercholesterolemia
William E. Connor and Sonja L. Connor

I-106 Optimal Nutritional Therapy in Treatment of Hyperlipoproteinemia
Arlene Wroldsen Caggiula

I-111 Pediatric Implications of Heterozygous Familial Hypercholesterolemia: Screening and Dietary Treatment
Peter O. Kwiterovich Jr.

PHARMACOLOGICAL TREATMENT OF FAMILIAL HYPERCHOLESTEROLEMIA

I-121 Treatment of Heterozygous Familial Hypercholesterolemia with Lipid-lowering Drugs
D. Roger Illingworth and Sandra Bacon

I-135 Effects of Combined Therapy with Lovastatin and Colestipol in Heterozygous Familial Hypercholesterolemia: Effects on Kinetics of Apolipoprotein B
Gloria Lena Vega, Cara East, and Scott M. Grundy

I-145 Treatment of Familial Hypercholesterolemia with Drugs in Children
Evan A. Stein

PLASMAPHERESIS AND SERGICAL TREATMENT OF FAMILIAL HYPERCHOLESTEROLEMIA

I-152 Plasmapheresis in Familial Hypercholesterolemia
Gilbert R. Thompson, Mahmud Barbir, Kazuo Okabayashi, Iris Trayner, and Simon Larkin

I-158 Portacaval Shunt and Liver Transplantation in Treatment of Familial Hypercholesterolemia
David W. Bilheimer

REVIEW

1 Cell Biology of Arterial Proteoglycans
Thomas N. Wight

21 Molecular Modeling of Protein-Glycosaminoglycan Interactions
Alan D. Cardin and H.J.R. Weintraub

33 Axial Dependence of Platelet-Collagen Interactions in Flowing Blood: Upstream Thrombus Growth Impairs Downstream Platelet Adhesion
Kjell S. Sakariassen and Hans R. Baumgartner

43 Effect of Fibrin on Endothelial Cell Production of Prostacyclin and Tissue Plasminogen Activator
Karen L. Kaplan, Timothy Mather, Laura DeMarco, and Sarra Solomon

50 Apolipoprotein E2(Arg_{158}→Cys) Frequency in a Hyperlipidemic French-Canadian Population of Apolipoprotein E2/2 Subjects: Determination by Synthetic Oligonucleotide Probes
Karl H. Weisgraber, Yvonne M. Newhouse, John M. Taylor, Bert Tuan, A. Christine Nestruck, Jean Davignon, and Robert W. Mahley

58 Dietary Fish Oil Increases Conversion of Very Low Density Lipoprotein Apoprotein B to Low Density Lipoprotein
Murray W. Huff and Dawn E. Telford

67 Intralipid Infusion Abolishes Ability of Human Serum to Cholesterol-load Cultured Macrophages
Michael Aviram, Kevin Jon Williams, Robert A. McIntosh, Yvon A. Carpentier, Alan R. Tall, and Richard J. Deckelbaum

76 Effects of Porcine Aortic Smooth Muscle Cell Conditioned Medium on Endothelial Cell Replication
Gayle A. Hoover, Suzanne McCormick, and Norman Kalant

84 Hormonal Contraceptive Increases Plasma Lipid Peroxides in Female Rats: Relationship to Platelet Aggregation and Lipid Biosynthesis
Maryvonne Clavatti, Denis Blache, and Serge Renaud

90 Age- and Sex-related Differences in Lipoproteins Containing Apoprotein A-I
Takao Ohta, Shinzabro Hattori, Masaji Murakami, Soroku Nishiyama, and Ichiro Matsuda

96 Structure of Apolipoprotein B-100 of Human Low Density Lipoproteins
Chao-yuh Yang, Zi-Wei Gu, Shi-ai Weng, Tae W. Kim, San-Hwan Chen, Henry J. Pownall, Paul M. Sharp, Shyan-Woei Liu, Wen-Hsiung Li, Antonio M. Gotto, Jr., and Lawrence Chan

109 Identification and Distribution of Fibrinogen, Fibrin, and Fibrin(ogen) Degradation Products in Atherosclerosis: Use of Monoclonal Antibodies
Alessandra Bini, John J. Fenoglio Jr., Ricardo Mesa-Tejada, Bohdan Kudryk, and Karen L. Kaplan

122 Effects of Chronic Ethanol Consumption in Atherosclerosis-Prone JCR:LA-Corpulent Rat
James C. Russell, Roger M. Amy, V. Manickavel, and Peter J. Dolphin

129 Test of Effect of Lipid Lowering by Diet on Cardiovascular Risk: The Minnesota Coronary Survey
Ivan D. Frantz Jr., Emily A. Dawson, Patricia L. Ashman, Laël C. Gatewood, Glenn E. Bartsch, Kanta Kuba, and Elizabeth R. Brewer

136 Association of Decreased Sex Hormone Binding Globulin and Cardiovascular Risk Factors
Steven M. Haffner, Michael S. Katz, Michael P. Stern, and James F. Dunn

ARTICLES

147 Sulfated Polysaccharides Modulate Effects of Acidic and Basic Fibroblast Growth Factors on Repair of Injured Confluent Human Vascular Endothelium
Claude Klein-Soyer, Alain Beretz, Jean-Pierre Cazenave, Elisabeth Wittendorp-Rechenmann, Jean-Luc Vonesch, Roger V. Rechenmann, Francis Driot, and Jean-Pierre Maffrand

154 Relationship of Sulfated Glycosaminoglycans and Cholesterol Content in Normal and Arteriosclerotic Human Aorta
Jürgen Hollmann, Annette Schmidt, Dirk-Barthold von Bassewitz, and Eckhart Buddecke

159 Dehydroepiandrosterone Feeding Prevents Aortic Fatty Streak Formation and Cholesterol Accumulation in Cholesterol-fed Rabbit
Yadon Arad, Juan J. Badimon, Lina Badimon, Wylie C. Hembree, and Henry N. Ginsberg

167 Profiles of Velocity in Coronary Arteries of Dogs Indicate Lower Shear Rate along Inner Arterial Curvature
David R. Bell, Hani N. Sabbah, and Paul D. Stein

176 Comparison of Arterial Intimal Clearances of LDL from Diabetic and Nondiabetic Cholesterol-fed Rabbits. Differences in Intimal Clearance Explained by Size Differences
Børge G. Nordestgaard and Donald B. Zilversmit

184 Functional Behavior of Vessels from Pigs with von Willebrand Disease. Values of Platelet Deposition Are Identical to Those Obtained on Normal Vessels
Lina Badimon, Juan J. Badimon, Vincent T. Turitto, Jacob Rand, and Valentin Fuster

189 Development of Atherosclerosis in Genetically Hyperlipidemic Rabbits during Chronic Fish-oil Ingestion
Stuart Rich, James F. Miller, Jr., Steven Charous, Harry R. Davis, Paula Shanks, Seymour Glagov, and William E.M. Lands

195 Augmented Vasoconstrictor Responses to Serotonin Precede Development of Atherosclerosis in Aorta of WHHL Rabbit
Phillip A. Wines, James M. Schmitz, Sandra L. Pfister, Fred J. Clubb, Jr., L. Maximilian Buja, James T. Willerson, and William B. Campbell

203 Adipose Tissue Distribution and Plasma Lipoprotein Levels in Obese Women. Importance of Intra-abdominal Fat
Jean-Pierre Després, Sital Moorjani, Mario Ferland, Angelo Tremblay, Paul J. Lupien, André Nadeau, Sylvie Pinault, Germain Thériault, and Claude Bouchard

211 Homozygous Familial Hypercholesterolemia among French Canadians in Québec Province
Sital Moorjani, Madeleine Roy, Claude Gagné, Jean Davignon, Daniel Brun, Marielle Toussaint, Marie Lambert, Lucien Campeau, Shirley Blaichman, and Paul Lupien

217 Hyperlipemic Response of Young Trained and Untrained Men after a High Fat Meal
Jeffrey R. Merrill, Robert G. Holly, Randy L. Anderson, Nader Rifai, Mary E. King, and Ronald DeMeersman

224 A Possible Mechanism for Accelerated Atherogenesis in Male Versus Female Rats
Ilona Staprans and James M. Felts

230 Transendothelial Transport of Low Density Lipoprotein in Association with Cell Mitosis in Rat Aorta
Shing-Jong Lin, Kung-Ming Jan, Sheldon Weinbaum, and Shu Chien

237 Apoprotein E Polymorphism and Coronary Artery Disease. Increased Prevalence of Apolipoprotein E-4 in Angiographically Verified Coronary Patients
Timo Kuusi, Markku S. Nieminen, Christian Ehnholm, Hannele Yki-Järvinen, Matti Valle, Esko A. Nikkilä, and Marja-Riitta Taskinen

242 Bsp 1286I Restriction Fragment Length Polymorphism Detects Ag(c/g) Locus of Human Apolipoprotein B in All 17 Persons Studied
Yanghong Ma, Xingbo Wang, Rene Bütler, and Verne N. Schumaker

247 Use of ^{3}H-Cholesteryl Linoleyl Ether as a Quantitative Marker for Loss of Cholesteryl Ester during Regression of Cholesterol-induced Aortic Atheromas in Rabbits
Olga Stein, Gideon Hollander, Yedidah Dabach, Gideon Halperin, and Yechezkiel Stein

253 Effect of Lanthanum Chloride on Established Atherosclerosis in the Cholesterol-fed Rabbit. Mitral Valve as a Site for Assessment of Treatment Effects
Peter J. Gillies, Candy S. Robinson, Beverly Y. Cockrell, and G. Jay Graepel

261 Contraceptive Steroid Effects on Lipids and Lipoproteins in Cynomolgus Monkeys
John S. Parks, Susan J. Pelkey, John Babiak, and Thomas B. Clarkson

269 Biological and Biochemical Properties of Fibroblast Growth Factors. Implications for the Pathogenesis of Atherosclerosis
Michael Klagsbrun and Elazer R. Edelman

ARTICLES

279 Regulation of Major Histocompatibility Gene Expression in Human Vascular Smooth Muscle Cells
Stephen J.C. Warner, Gary B. Friedman, and Peter Libby

289 Balloon Catheter Injury to Rabbit Carotid Artery. I. Changes in Smooth Muscle Phenotype
John A. Manderson, Peter R.L. Mosse, Julie A. Safstrom, Simone B. Young, and Gordon R. Campbell

299 Balloon Catheter Injury to Rabbit Carotid Artery. II. Selective Increase in Reactivity to Some Vasoconstrictor Drugs
John A. Manderson, Tom M. Cocks, and Gordon R. Campbell

308 Genetic and Environmental Determinants of Serum Lipids and Lipoproteins in French Canadian Families
Louis Pérusse, Jean-Pierre Després, Angelo Tremblay, Claude Leblanc, Jean Talbot, Claude Allard, and Claude Bouchard

319 Large Buoyant LDL-like Particles in Hepatic Lipase Deficiency
Johan H. Auwerx, Carol A. Marzetta, John E. Hokanson, and John D. Brunzell

326 Detection and Characterization of the Heterozygote State for Lipoprotein Lipase Deficiency
Stephan P. Babirak, Per-Henrik Iverius, Wilfred Y. Fujimoto, and John D. Brunzell

335 Apolipoprotein, Low Density Lipoprotein Subfraction, and Insulin Associations with Familial Combined Hyperlipidemia. Study of Utah Patients with Familial Dyslipidemic Hypertension
Steven C. Hunt, Lily L. Wu, Paul N. Hopkins, Barry M. Stults, Hiroshi Kuida, Maria E. Ramirez, Jean-Marc Lalouel, and Roger R. Williams

345 Heterogeneity of Low Density Lipoprotein Responses to Fish-Oil Supplementation in Hypertriglyceridemic Subjects
Gordon Schectman, Sushma Kaul, and Ahmed H. Kissebah

355 Cholesterol Homeostasis in Mononuclear Leukocytes from Patients with Familial Hypercholesterolemia Treated with Lovastatin
Fay C. Hagemenas and D. Roger Illingworth

362 Plasma Plasminogen Activator Inhibitor-1 in Angina Pectoris. Influence of Plasma Insulin and Acute-phase Response
Irene Juhan-Vague, Marie Christine Alessi, Patrick Joly, Xavier Thirion, Philippe Vague, Paul J. Declerck, André Serradimigni, and Desiré Collen

368 Regional Variability of Prostacyclin Biosynthesis
James I. Fann, Peter D. Cahill, R. Scott Mitchell, and D. Craig Miller

374 Atherosclerosis in Rabbit Vein Grafts
Robert M. Zwolak, Thomas R. Kirkman, and Alexander W. Clowes

380 Effect of Cholesterol Feeding on Lipolytic Activities in High- and Low-Responding Rhesus Monkeys
Ashim K. Bhattacharyya, Harold N. Baker, Douglas A. Eggen, Gray T. Malcom, Paul S. Roheim, and Jack P. Strong

390 Factors Associated with High Density Lipoprotein Cholesterol in a Population with High High Density Lipoprotein Cholesterol Levels
Krisela Steyn, Jean Fourie, A.J. Spinnler Benadé, Jacques E. Rossouw, Marietjie L. Langenhoven, Gina Joubert, and Derek O. Chalton

398 Oxidative Modification of Beta-Very Low Density Lipoprotein. Potential Role in Monocyte Recruitment and Foam Cell Formation
Sampath Parthasarathy, Mark T. Quinn, Dawn C. Schwenke, Thomas E. Carew, and Daniel Steinberg

405 Differential Distribution of Apolipoprotein E Isoforms in Human Plasma Lipoproteins
Armin Steinmetz, Claudia Jakobs, Sabine Motzny, and Hans Kaffarnik

783 Factor VII Assays, Plasma Triglyceride Levels, and Cardiovascular Disease Risk
Kenneth G. Mann

REVIEW

785 Pathophysiology of Reverse Cholesterol Transport. Insights from Inherited Disorders of Lipoprotein Metabolism
Drago Reichl and Norman E. Miller

798 Effect of Alteration in Triglyceride Levels on Factor VII-Phospholipid Complexes in Plasma
Anne Helen Skartlien, Sissel Lyberg-Beckmann, Ingar Holme, Ingvar Hjermann, and Hans Prydz

802 Complement Receptors and Regulatory Proteins in Human Atherosclerotic Lesions
Paul S. Seifert and Göran K. Hansson

812 Increase in Endothelial Cell Density before Artery Enlargement in Flow-loaded Canine Carotid Artery
Hirotake Masuda, Koichi Kawamura, Kohei Tohda, Takesi Shozawa, Masato Sageshima, and Akira Kamiya

824 β-Very Low Density Lipoprotein Pretreatment of Endothelial Monolayers Increases Monocyte Adhesion
Mary C. Territo, Judith A. Berliner, Laura Almada, Rigoberto Ramirez, and Alan M. Fogelman

829 Identification of LDL Receptor Gene Marker Associated with Altered Levels of LDL Cholesterol and Apolipoprotein B in Baboons
James E. Hixson, Candace M. Kammerer, Laura A. Cox, and Glen E. Mott

836 Effects of Eicosapentaenoic and Docosahexaenoic Acids on Apoprotein B mRNA and Secretion of Very Low Density Lipoprotein in HepG2 Cells
Sau-Heng Wong, Edward A. Fisher, and Julian B. Marsh

842 Effect of Stenosis on Wall Motion. A Possible Mechanism of Stroke and Transient Ischemic Attack
Richard L. Binns and David N. Ku

848 Prednisone Increases Low Density Lipoprotein in Cynomolgus Monkeys Fed Saturated Fat and Cholesterol
Walter H. Ettinger, Robert C. Dysko, and Thomas B. Clarkson

856 Two Distinct Truncated Apolipoprotein B Species in a Kindred with Hypobetalipoproteinemia
Elaine S. Krul, Makoto Kinoshita, Philippa Talmud, Steve E. Humphries, Saralinda Turner, Anne C. Goldberg, Keely Cook, Eric Boerwinkle, and Gustav Schonfeld

869 Plasma Lipid Secretion and Clearance in Hyperlipidemic JCR:LA-Corpulent Rats
James C. Russell, Dorothy G. Koeslag, Roger M. Amy, and Peter J. Dolphin

877 Unlikely Association between Clinically Apparent Herpesvirus Infection and Coronary Incidence at Older Ages. The Framingham Heart Study
Richard J. Havlik, William C. Blackwelder, Richard Kaslow, and William Castelli

881 Preservation and Structural Adaptation of Endothelium over Experimental Foam Cell Lesions. Quantitative Ultrastructural Study
Katherine E. Taylor, Seymour Glagov, and Christopher K. Zarins

895 Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits. I. Focal Increases in Arterial LDL Concentration Precede Development of Fatty Streak Lesions
Dawn C. Schwenke and Thomas E. Carew

908 Initiation of Atherosclerotic Lesions in Cholesterol-fed Rabbits. II. Selective Retention of LDL vs. Selective Increases in LDL Permeability in Susceptible Sites of Arteries
Dawn C. Schwenke and Thomas E. Carew

919 Effect of Dietary Fat Saturation and Cholesterol on Low Density Lipoprotein Degradation by Mononuclear Cells of Cebus Monkeys
Paul C. Kuo, M. Audrey Rudd, Robert Nicolosi, and Joseph Loscalzo

928 Parental History of Diabetes Is Associated with Increased Cardiovascular Risk Factors
Steven M. Haffner, Michael P. Stern, Helen P. Hazuda, Braxton D. Mitchell, Judith K. Patterson, and Eleuterio Ferrannini

934 Levels of Three Hemostatic Factors in Relation to Serum Lipids. Monocyte Procoagulant Activity, Tissue Plasminogen Activator, and Type-1 Plasminogen Activator Inhibitor
David J. Crutchley, Gizelle V. McPhee, Martin F. Terris, and Maria A. Canossa-Terris
